

CHECKLIST TO TRAILER SAFELY

Assess your horse for health and fitness before trailering and only trailer a healthy horse, unless it's being shipped to a vet hospital for treatment.
Make sure the trailer is the appropriate size for your horse in both width AND height.
Know how to safely haul the trailer BEFORE you load the horse and inspect it before every trip.
If you can, avoid travelling alone.
If you are hauling someone else's horse in your trailer, be sure to agree in advance who will be responsible if the horse is injured or the trailer is damaged.
Train your horse to load and unload in a safe and calm manner ahead of time.
Wear gloves, boots, and a helmet when loading and unloading horses.
Make sure there are no hazards near the horse trailer (farm machinery, fencing, ditches) when you are loading and unloading horses.
Apply leg wraps and head bumper before your horse gets into the trailer.
Never put a horse into a trailer that is unhitched, or unhitch a trailer with the horse still inside.
If the trailer is dark inside, open the doors and turn on the lights to increase visibility.
Never load a horse into the trailer if you do not have an easy escape route.
Always load a single horse on the left side, or tie on the left side in slant loads, as roads are "crowned" in the middle.

If more than one horse is being unloaded from the trailer, keep at least one horse in sight of the last horse until he has been safely unloaded.
 Never get into the trailer or open the door if the horse is panicked. Instead, seek assistance.
 Make sure all inoculations are current and you are carrying the certificates.
 Carry a complete emergency first aid kit (for both human and horse) and know how to use it.
 Make sure the trailer is well vented and the trailer mats fit properly (snugly).
 Check that all trailer doors are secured and locked before setting out and after each stop.
 Ensure that the trailer has reflective tape top, bottom and sides.
 Drive defensively. Allow double the normal braking distance, and travel at lower than normal speeds.

CHECKLIST FOR SAFE TRAILERING

Please do a walk around before every trip

For yo	ur horse trailer:			
For you	Water Buckets/sponges Spare halters and lead ropes Broom, shovel, disposal bags Emergency triangles or flares 2 spare tires Wheel chocks (wedges to prevent accidental movement) Hydraulic jack – capable of jacking your trailer while loaded Lug wrench Spare bulbs for all lights 2 flashlights (one large Maglite flashlight or portable spotlight, one headband flashlight) Duct tape and electrical tape WD-40 Knife First aid kit (equine/human) Fire extinguisher			
	Portable fencing or a roll of construction fencing			
For your tow vehicle:				
	Vehicle and trailer registration Proof of insurance and roadside assistance membership Gloves Jumper cables Spare tire, jack and tire iron Tool kit including wiring, fuses, spare belts and hoses Tow chain Map book			

TRAILER WALKAROUND

I am within my gross vehicle rated capacity
Tires are in good condition
 The wheel bearings were serviced this year
 Lug nuts are tight
Check tire pressure on ALL tires (including inside ones)
The trailer hitch is secured to the frame of the vehicle, not the bumper
The ball size is correct and ball is tightly secured to the ball mount
The hitch is in good condition, is lubricated, and is not showing signs of wear
The hitch is seated properly on the ball and is locked

Safety chains are properly connected UNDER the hitch
Trailer jack is fully retracted or removed
The electrical connection is the right one and is properly connected
The emergency breakaway system is properly connected
The breakaway battery is charged
All trailer lights (brakes/turn signals/running/perimeter) are working
Interior lights have safety cages to protect them from horses' heads
The brake controller is working
The trailer is sitting level
The floor has been checked and is in good condition. Mats are tight fitting
Check trailer for any hazards – rough edges, chains that don't open properly, loose wiring, door locks that are difficult to open or that don't lock, butt bars/chains that don't close properly
All horses have leg wraps and a head bumper
